

## Set 4 Test 3

### Part 1

You should spend about 20 minutes on this task. Write at least 150 words.

The graph below shows global primary energy consumption from four sources between 1990 and 2040, with figures after 2020 given as projections.

Summarise the information by selecting and reporting the main features, and make comparisons where relevant.

## Part 2

You should spend about 40 minutes on this task. Write at least 250 words.

Write about the following topic:

Drugs and technologies that improve memory, concentration or learning ability may become widely available to healthy people in the future. However, some people are concerned that these cognitive enhancements could increase inequality because only wealthy individuals may be able to afford them.

What social and ethical problems could the widespread use of cognitive enhancements cause? What measures could be taken to reduce these problems?

Give reasons for your answer and include any relevant examples from your own knowledge or experience.
