

Set 6 Test 3

Part 1

You should spend about 20 minutes on this task. Write at least 150 words.

The diagram below illustrates the evolution of public transport payment systems in a major city from 1980 to the present day, showing the key technologies introduced in each phase.

Summarise the information by selecting and reporting the main features, and make comparisons where relevant.

Part 2

You should spend about 40 minutes on this task. Write at least 250 words.

Write about the following topic:

Governments and companies are increasingly using artificial intelligence to analyse people's online activity and information collected in public places. Some people believe that this can help identify social, economic and public health problems at an early stage and improve public safety. Others argue that such monitoring threatens personal privacy and may lead to unfair decisions because artificial intelligence systems can be biased.

Discuss both these views and give your own opinion.

Give reasons for your answer and include any relevant examples from your own knowledge or experience.

Want to compare your response?
