

Set 8 Test 2

Part 1

You should spend about 20 minutes on this task. Write at least 150 words.

The charts below compare public health expenditure per capita, the incidence of vaccine-preventable diseases and primary healthcare access rates across five selected demographic groups and the national average in a country in 2023.

Summarise the information by selecting and reporting the main features, and make comparisons where relevant.

Part 2

You should spend about 40 minutes on this task. Write at least 250 words.

Write about the following topic:

People displaced solely by climate change or environmental disasters are generally not recognised as refugees under current international law. Some people believe that international protection should be expanded to include those forced to leave their homes for these reasons. Others argue that this could place excessive pressure on asylum systems and that funding climate adaptation in vulnerable countries would be a more effective response.

Discuss both these views and give your own opinion.

Give reasons for your answer and include any relevant examples from your own knowledge or experience.

Want to compare your response?
