

Set 10 Test 2

Part 1

You should spend about 20 minutes on this task. Write at least 150 words.

The chart below presents a multi-dimensional analysis of national innovation capacity for eight countries, correlating research and development (R&D) expenditure per capita, the percentage of science and engineering graduates in the workforce, and the proportion of female researchers, with each country's position in a global innovation index.

Summarise the information by selecting and reporting the main features, and make comparisons where relevant.

Part 2

You should spend about 40 minutes on this task. Write at least 250 words.

Write about the following topic:

The rapid development of quantum computing may bring significant benefits to areas such as medicine and scientific research. However, it may also create risks by weakening current methods of protecting digital information. Some people believe that countries should compete to become leaders in this technology. Others think that countries should cooperate to regulate its development and share its benefits fairly.

Discuss both views and give your own opinion.

Give reasons for your answer and include any relevant examples from your own knowledge or experience.
