

Set 10 Test 4

Part 1

You should spend about 20 minutes on this task. Write at least 150 words.

The diagram below illustrates the circular economy model for electronic consumer goods, showing the stages from sustainable design and production to retail, consumption, post-use collection and sorting, and three possible recovery pathways: repair and resale, component recovery and material recycling.

Summarise the information by selecting and reporting the main features.

Part 2

You should spend about 40 minutes on this task. Write at least 250 words.

Write about the following topic:

Advances in biotechnology and information technology are making it possible to create biological systems and living materials that can perform useful functions in areas such as medicine and construction. Some people believe that the development of these technologies should proceed cautiously because their long-term effects are uncertain. Others argue that innovation should be encouraged so that society can benefit from these technologies more quickly.

Discuss both views and give your own opinion.

Give reasons for your answer and include any relevant examples from your own knowledge or experience.
