

Set 11 Test 2

Part 1

You should spend about 20 minutes on this task. Write at least 150 words.

The graph and table below show the relationships between urban population density, measured in thousands of persons per square kilometre, and two key indicators of urban liveability—average commute time and accessible green space per capita—across eight major global cities.

Summarise the information by selecting and reporting the main features, and make comparisons where relevant.

Part 2

You should spend about 40 minutes on this task. Write at least 250 words.

Write about the following topic:

Advances in brain-computer interfaces (BCIs), which connect the human brain with computer systems, could improve the treatment of serious medical conditions and may also enhance human abilities. Some people believe that the potential health and practical benefits of these technologies outweigh the risks. Others argue that certain uses should be temporarily restricted because of concerns about mental privacy and social inequality.

Discuss both views and give your own opinion.

Give reasons for your answer and include any relevant examples from your own knowledge or experience.

Want to compare your response?
