# SAMPLE IELTS WRITING CORRECTION

**Task 2** Write about the following topic:

Generative artificial intelligence (AI) systems can produce text, computer code, images and other forms of media. Some people believe that these tools make creative work more accessible and can significantly improve productivity. Others worry that they may weaken human skills, reduce demand for creative professionals and make human-created work less valuable.

Discuss both views and give your own opinion.

Give reasons for your answer and include any relevant examples from your own knowledge or experience.

**STUDENT RESPONSE**

Nowadays, generative AI can create text, code, images and other media. Some people think it is useful for creative work and productivity, but other people are worried about its bad effects. In this essay, I will discuss both views and give my opinion.

On the one hand, AI tools make creative work easier for many people. For example, a person who cannot draw can make a picture by writing a few words, and a small business owner do not need to pay a designer for making a simple poster. Moreover, AI can save a lot of time. Programmers can use it to write code faster, and students can use it to get ideas for their essays. As a result, people can finish more work in a short time.

On the other hand, there are some serious concerns. If people depend on AI too much, they may lose their own skills. For instance, students who always ask AI to write for them may never learn how to write well by themselves. In addition, companies may use AI instead of hiring writers and artists, so the demand for these professionals will decrease. Also, when AI work is everywhere, people may feel that human-made work is less special and valuable.

In my opinion, I agree with both views to some extent, but I think the benefits are bigger if we use AI in a correct way. AI should be a tool to help people, not to replace them. Schools should teach students to use it carefully, and the government should make rules to protect creative workers. In conclusion, generative AI has both advantages and disadvantages, and we need to balance them.

**Commented [AV1]:** other forms of media

**Commented [AV2]:** it can support creative work and improve productivity

**Commented [AV3]:** negative effects

**Commented [AV4]:** make creative work more accessible

**Commented [AV5]:** does not need

**Commented [AV6]:** to make

**Commented [AV7]:** generate ideas

**Commented [AV8]:** complete more work in less time

**Commented [AV9]:** rely too heavily on AI

**Commented [AV10]:** AI-generated work becomes widespread

**Commented [AV11]:** human-created work

**Commented [AV12]:** both views have some merit

**Commented [AV13]:** benefits are greater

**Commented [AV14]:** responsibly

**Commented [AV15]:** governments should introduce regulations

**Commented [AV16]:** we need to balance its benefits against its risks

## ASSESSMENT REPORT

| | | |
|---|---|---|
| **WORD COUNT** | **278** | |
| **Task Response** | **7.0** | Addresses both views and gives a clear opinion with relevant examples; development is somewhat general. |
| **Coherence & Cohesion** | **7.0** | Clear paragraphing and logical progression; cohesive devices are generally effective. |
| **Lexical Resource** | **6.0** | Meaning is clear, but vocabulary is often basic or informal and several collocations are awkward. |
| **Grammatical Range & Accuracy** | **6.5** | A mix of simple and complex structures is generally accurate; one clear agreement error remains. |
| **ESTIMATED OVERALL BAND** | **6.5** | |

**Overall comments:** The essay addresses both views, gives a clear opinion and uses relevant examples. Organisation is logical and easy to follow. However, the vocabulary is often basic or informal, several collocations are awkward, and there is a subject-verb agreement error.

**Advice:** Use more precise academic vocabulary, replace informal phrases with natural collocations, and extend key ideas with slightly deeper explanation. Check subject-verb agreement carefully.
